

On 10 March 2021 the EU Disclosure Regulation on sustainability-related disclosures (SFDR) will come into force.

The financial market has been gearing up for the regulatory changes for some months now. The SFDR forms part of the EU's ESG Action Plan and sets out key obligations for asset managers ("financial market participants") to comply with the provisions.

This webinar will provide details on the key requirements, how asset managers are adapting to the requirements and what implementation looks like in practice.
