

Catherine Moore will be joining the panel at this seminar to mark the publication of WE ARE GUERNSEY's latest research report, which analyses key trends and insights in global philanthropy – and the various structures and vehicles available in Guernsey to enable those families and investors looking to invest in philanthropic causes, to achieve maximum impact.

The seminar will begin with an outline of the recently published report's key findings, followed by a panel session of UK and Guernsey-based specialists and practitioners discussing the findings and assess how global finance centres such as Guernsey have an important role to play. The event will finish with a networking session.
