Who we are

Our partner led team of first class lawyers is commercially minded and client-focused.

Personal, responsive and bespoke, Ogier's advice to international mining and other natural resource clients includes setting up both private holding structures and public listed vehicles.

We provide legal advice on BVI, Cayman, Guernsey, Jersey and Luxembourg law. We operate in nine jurisdictions in key financial centres and have a presence in the BVI, Cayman, Guernsey, Hong Kong, Jersey, London, Luxembourg, Shanghai and Tokyo.

They were responsive, they met the timetable, they flagged issues to us and overall they worked as an integral part of the transaction.

Leading London Law Firm

Ogier has a stellar corporate practice providing specialist legal advice across various offshore jurisdictions and across various different sectors and workstreams. Legal 500 UK, Jersey, Corporate and Commercial 2020

Why go offshore?

Through our global network we assist clients to establish and use holding, operating and investment vehicles in the jurisdiction best suited to their objectives.

 They were very responsive and very thorough, and they have a good deep bench. However, I think that above all their responsiveness really marked them out when compared with the competition.
Major investment adviser

 Ogier provides an established and highly-regarded corporate practice that is very committed to its work and fully responsive to all key situations.
Legal 500 Caribbean, Cayman Islands, Corporate and Commercial, 2020

Reasons for using an offshore company include:

- Zero corporation tax, no capital gains tax and no capital transfer tax (or structuring to permit equivalent effect in Luxembourg)
- No withholding tax on dividends, interest and royalties
- Corporate laws are based on the equivalent English law (other than Luxembourg), which is familiar to investors round the world, but benefit from additional business focused innovations and operational flexibility
- Politically stable jurisdictions with a global reputation as first class international financial centres and a proven track record of attracting investment from around the world
- Highly developed and trusted court systems based on English common law principles (other than Luxembourg)
- Although likely to be substantially compliant in standard form, the company's constitutional documents can be drafted to accommodate any specific requirements of the relevant listing rules
- The shares of Guernsey and Jersey companies can be traded directly through CREST in the UK.
- BVI and Cayman company shares are freely traded via depositary interests
- BVI, Cayman, Jersey, Guernsey and Luxembourg companies can each hold shares in treasury which can facilitate employee benefit schemes
- BVI, Cayman, Guernsey and Jersey companies have the ability to distribute from a wide range of sources not just distributable reserves. This may be an advantage over other companies seeking to maintain a consistent dividend policy, including Hong Kong public companies which need to have qualifying profits and satisfy additional capital maintenance requirements in order to make a distribution.

Choice of location

BVI, Cayman, Guernsey, Jersey and Luxembourg are mature, sophisticated international financial service centres.

They offer clients excellent professional infrastructures in economic and politically stable environments and are supportive of natural resources businesses.

Each of our jurisdictions, BVI, Cayman, Guernsey, Jersey and Luxembourg, offer:

- Economic and political stability
- Flexible, independently endorsed regulatory and legal framework
- Tax neutral location (or structuring to achieve equivalent effect in the case of Luxembourg)
- Mature, well respected legal system
- Track record of product and service innovation
- Skilled and responsive workforce
- Availability and choice of other service providers: administrators, auditors, bankers, custodians and asset managers

- Luxembourg is a qualifying centre of excellence for carbon investment vehicles
- Our Hong Kong office provides timely BVI, Cayman, Guernsey and Jersey advice in the Asian time zone
- Our Guernsey and Jersey offices provide BVI legal advice in the European time zone.

We work closely with service providers in Mauritius to provide an integrated Ogier led service for clients.

They have great market knowledge and presence, and are commercial and efficient.

Chambers UK, Corporate and Finance, 2021

Services for mining and natural resources clients

Good bench depth in Jersey. The pre-eminent corporate firm and have the ability to handle large and complex corporate transactions.

Legal 500 UK, Jersey, Corporate and Commercial, 2021

We have extensive experience assisting mining and natural resources clients to establish and utilise holding, operating and investment vehicles in the jurisdiction best suited to their current and future objectives.

We have assisted a number of high profile groups relocate from other countries to BVI, Cayman, Guernsey, Jersey and Luxembourg.

Our services include:

- Pre-IPO planning
- IPO/fund raising
- Cashbox structures
- Special purpose acquisition companies (SPACs)
- Redomiciliation
- Migration
- Mining and natural resources funds
- Private client and trust advice

IPO/fund raising

Ogier works with international law firms and advisers and listing companies on the Main List and AIM in London, as well as markets around the world including New York, Toronto, Moscow, Paris and Hong Kong.

We have also been involved in numerous fund raisings for resources companies and provide 'cashbox' structures for UK plcs raising funds in the secondary capital markets.

Jurisdictions such as the BVI, Cayman, Guernsey and Jersey are frequently chosen as the jurisdiction of domicile for Special Purpose Acquisition Companies (SPACs). A SPAC raises money through an IPO with the intention of identifying and acquiring a business within a specified period (usually a period of up to 24 months from the IPO).

SPACs provide investors with the opportunity of investing in private equity type transactions, while offering listed company transparency and disclosure as well as the liquidity benefits of the shares being freely tradable on the open market.

He is accommodating and can appreciate the clients' commercial goal and come up with sensible and satisfying solutions.

He is very good at providing solutions to complex issues.
Chambers Asia-Pacific, 2019

Holding companies

Companies in all our jurisdictions are regularly used as acquisition vehicles around the world and can hold any type of asset.

They display a keen understanding of what is most important to clients and are very accommodating of challenging and tight deadlines. Chambers UK, Jersey, Corporate and Finance, 2021

They are flexible and permit structuring to meet clients' needs and international banks are familiar and comfortable with lending to such companies.

Jersey, Guernsey, BVI, Cayman and Luxembourg have been the jurisdictions of choice for a number of high profile groups relocating from other countries over the last few years.

Redomiciling

The redomiciling process involves placing a new offshore company above the existing listed holding company, typically using a scheme of arrangement or similar in the current jurisdiction of incorporation. Shareholders of the existing company receive shares in the new company. For a listed company the shares of the new company are admitted to trading on the relevant exchange and the listing of the existing company is cancelled. Relocation may occur as part of a pre IPO or other structuring exercise for an unlisted company as well.

The company will not pay tax in BVI, Cayman, Guernsey or Jersey and there are no capital gains or stamp duty taxes on share transfers in any of these jurisdictions. Structuring in Luxembourg can be used to significantly mitigate local taxes down to zero or nearly zero.

Migration

It is also possible to migrate companies to and from each of BVI, Cayman, Guernsey, Jersey and Luxembourg without court approval. The relevant laws confirm that the company continues (with assets and liabilities intact) in the new jurisdiction. This can be a useful pre-IPO restructuring tool if it is preferred not to insert a new holding company.

Moving business operations to Jersey and Guernsey

It is increasingly important to demonstrate proper substance in the jurisdiction where management occurs.

We have assisted multiple natural resources companies with their relocations.

Jersey and Guernsey has welcomed many new businesses in recent years including mining and oil companies and fund managers, all of whom have been keen to take advantage of both the business friendly environment and the quality of lifestyle on offer.

Jersey and Guernsey have all the infrastructure and expertise most businesses require with office space both available and under construction. Back office functions - IT, banking, compliance and accounting - all readily available.

International businesses with a diverse geographical asset base and traditional London based companies are realising that for both business owners and management it makes sense to relocate to a more attractive tax neutral jurisdiction, particularly as a company is heading towards profitability. Jersey and Guernsey law does not prohibit foreign employees and owners from moving to and working in the islands or businesses setting up in Jersey or Guernsey.

We have helped the following companies relocate to Jersey:

- Randgold Resources
- Consolidated Minerals
- Centamin
- Strada Energy

The corporate and debt teams are led by some very solid lawyers who provide sound technical advice but understand the commercial needs of the private equity clients. Legal 500 Asia-Pacific, Hong Kong, Corporate, 2020
